

Bead Self-Locking Stainless Steel Cable Tie (BT Series)

The Bead Self-Locking Stainless Steel Cable Tie provides a strong, durable method of bundling, identifying and fastening, which can be used in virtually all indoor, outdoor and underground (including direct burial) applications, where severe environmental conditions exist. The ties are designed for use in critical applications where strength, vibration, radiation, weathering, corrosion and temperature extremes are a factor.

These cable ties are made from either 316 marine grade stainless steel or 304 stainless steel. The dimension and coating is subject to customer request.
